Asset Protection Solutions

Asset Protection Solutions

Table of Contents

At enVision we are obsessed with helping retailers protect their assets while helping brands convert shoppers into customers at the same time.

We carefully consider the needs of the retailers, the brands, as well as the desires of the shopper, and develop solutions that serve all three.

We offer a complete line of asset-protecting solutions, including custom displays, enclosures, door kits, and accessories that allow retailers to protect their assets while engaging shoppers.

TRANSFORMING INSIGHTS INTO EXECUTION

53" Kit
*patent pending

FEATURES / BENEFITS

- Attaches to stock Lozier and Madix gondolas
- Breach-Resistant design prevents pry bar access
- Available in 24" and 53" heights - custom sizes available upon request
- Impact-Resistant tempered glass doors - 1/4" thick
- Door kit ships with doors pre-installed
- Anodized aluminum door pulls
- Interior shelves must be 2" shorter than base deck & upper shelf for installation
- Accommodates customer-supplied SFIC locks

Breach-Resistant Security

Our PATENT PENDING solution is engineered to prevent pry bar break-ins & minimize loss

Quick & Easy Installation

Door kits install in as little as 5 minutes with minimal parts and complexity

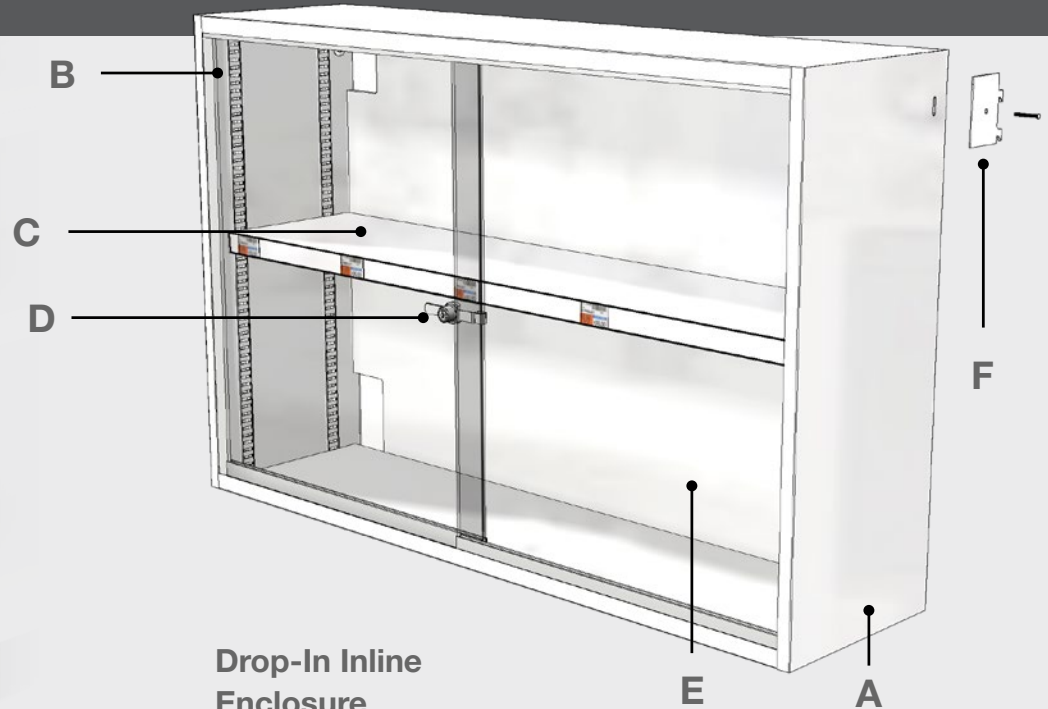

Reduced Components

Optimized design requires minimal hardware to install - parts kit contains only 6 items

Drop-In Inline Enclosure*

In-Line Solutions

Drop-In Inline Enclosure COMPONENTS

- A. STEEL BODY
- B. SHELF TRACK
- C. ADJUSTABLE SHELF
- D. LOCK
- E. TEMPERED GLASS DOORS
- F. SECURITY BRACKET

INSTALL

No Tools Required

A plug & play enclosure ships fully assembled and secures to any gondola base deck or shelf. Interior shelves adjust in 1/2" increments.

*patent pending

TRANSFORMING INSIGHTS INTO EXECUTION

Drop-In Inline Enclosure can be equipped with a kit of accessories to customize the case to your preferred brand presentation.

*patent pending

ENCLOSURE HEADER

- Mounts to top of enclosure and includes a changeable graphic
- Available in 3ft or 4ft widths (custom sizes available)
- 3” changeable graphic holder

LED LIGHTING

- LED light bar mounts to underside of shelving
- Light bars can string together to light multiple shelves
- Magnetic attachment makes lighting easy to install

WINDOW CLING GRAPHICS

- Printed decals attach to the glass doors of standard enclosures
- Decals provide additional space for brand claims or graphics to dress encasement (frost texture, patterns, etc.)
- Customized to meet your needs

SUB HEADER

- Mounts to interior shelves to provide additional messaging space
- 2” changeable graphic (standard) Graphic size can be customized depending available interior space
- Dual channel provides space for standard retailer price labels

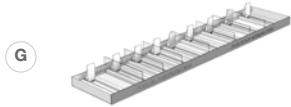

END CAP / SIDE PANEL SHROUD

- Mounts to top of enclosure and includes a changeable graphic
- Available in 3ft or 4ft widths (custom sizes available)
- 3” changeable graphic holder

SHELF EDGE INSERT

- Insert drops into existing shelf channel to provide color or printed patterns behind retailer price labels
- Larger inserts can stick out of channel for messaging space
- Made of plastic or cardstock depending on application

STANDARD MERCHANDISING TRAY

- Merchandising Tray sits on shelf inside enclosure
- Tray keeps product organized for improved presentation
- Adjustable dividers and product pushers keep product faced
- Changeable graphic strip on front of tray

RISER MERCHANDISING TRAY

- Riser tray prevents obstructed view of product behind door track on bottom shelf
- Adjustable dividers and product pushers keep product faced
- Changeable graphic strip on front of tray

Gondola Base Deck Locking Drawer*

In-Line Solutions

*patent pending

Innovative enclosure converts space underneath a gondola base deck into a secure backstock storage solution that helps streamline replenishment at shelf level and frees up space in the back room.

TRANSFORMING INSIGHTS INTO EXECUTION

The One-To-Show Locking Case is self-contained asset protection solution. This unique solution features an ADA compliant shelf that holds a single facing for purchase, tester product, or dressed for a touch & learn product experience.

FEATURES / BENEFITS

- Durable Sheet Metal Construction
- Keeps One High Value SKU Available While Protecting Backstock
- Promotes An Interactive Shopping Experience
- Fast Installation / Arrives Fully Assembled
- Prominent Branding Visible From All Viewing Angles
- Forward Compatible Design Allows For Cost-Effective Rebranding
- Universal Mounting Fits All Gondolas

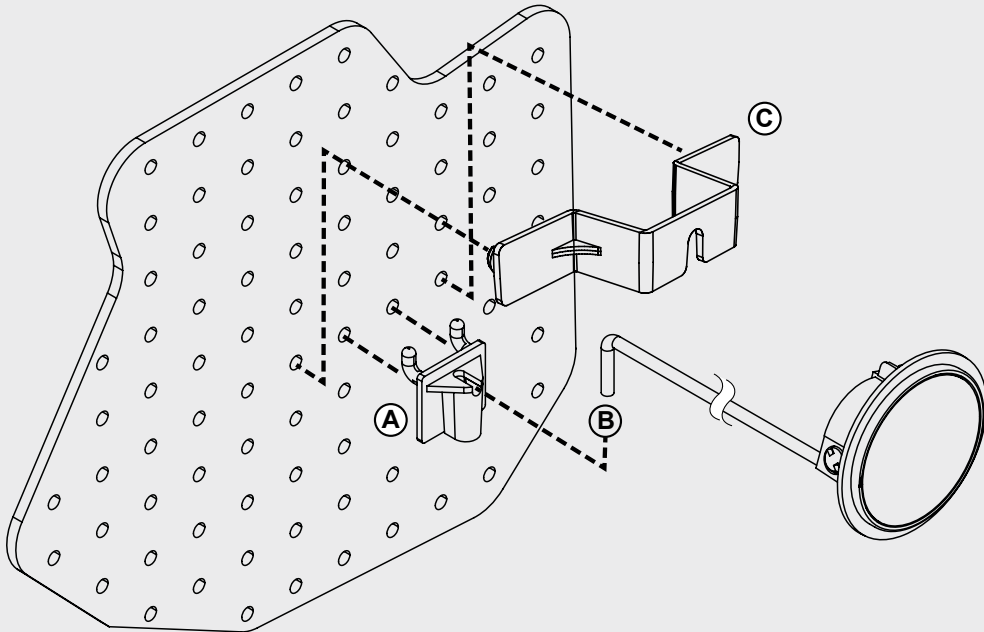

Anti Sweep Laundry Lock*

Shelf Solutions

Our Patent Pending Anti-Sweep Laundry Lock secures bottles on shelf with a hook-mounted puck that traps bottles at the handle. Lock is opened by store associates with a standard Alpha Key. The custom peghook design allows locks to easily be installed; even on lower gondola shelves to protect bottled merchandise. Puck labels can be customized with your own graphics or branding.

Easy Installation

- 1. Hook Wire Mount (A) into Pegboard
- 2. Slip the end of Wire (B) into the Wire Mount.
- 3. Fit the Retainer (C) over the Wire and press it into the Pegboard holes on each side of the Wire Mount.

INSTALL

1-5 minutes

DIFFICULTY

Store Associate
Install

Also works with dispenser bottles!

Anti-Sweep Hinged Shelf Barrier*

Shelf Solutions

Anti-Sweep solution features hinged clear PETG doors limit access to merchandise without obstructing view of product on gondola shelves. Spring loaded hinges allow shelf barriers to self-close and reduce sweeping.

FEATURES / BENEFITS

- Hinged clear plastic shelf barriers
- Spring loaded hinges / self-closing barrier
- Outward opening doors don't interfere with product on shelf
- Easily installed with a screwdriver
- Pricing ticket channel with optional graphic insert
- Powdercoated steel frame

TRANSFORMING INSIGHTS INTO EXECUTION

Target Ulta Security Case

Shelf Solutions

This retrofit shelf security solution was developed for Target to secure the assets in their Ulta shop-in-shop locations.

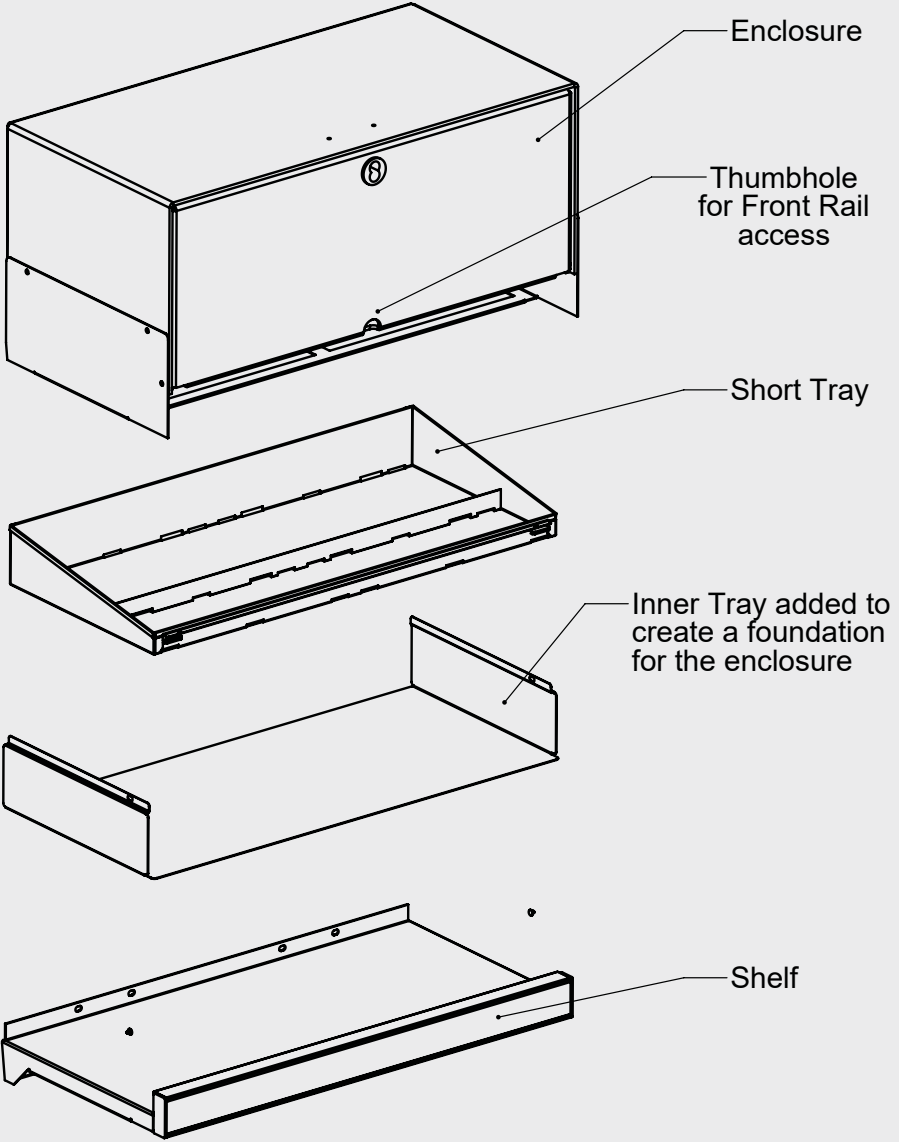

Security case needed to attach to the existing store shelves without mechanical fasteners or damage to the shelves.

This solution featured an innovative clamp-like architecture that created a locking shroud around each 24" wide shelf.

FEATURES / BENEFITS

- Mounts to existing shelves without mechanical fasteners
- Clear polycarbonate encasement & door panel
- Bottom-hinged door for easy restocking / product access when open
- Heavy-duty steel construction
- SFIC compliant lock

TRANSFORMING INSIGHTS INTO EXECUTION

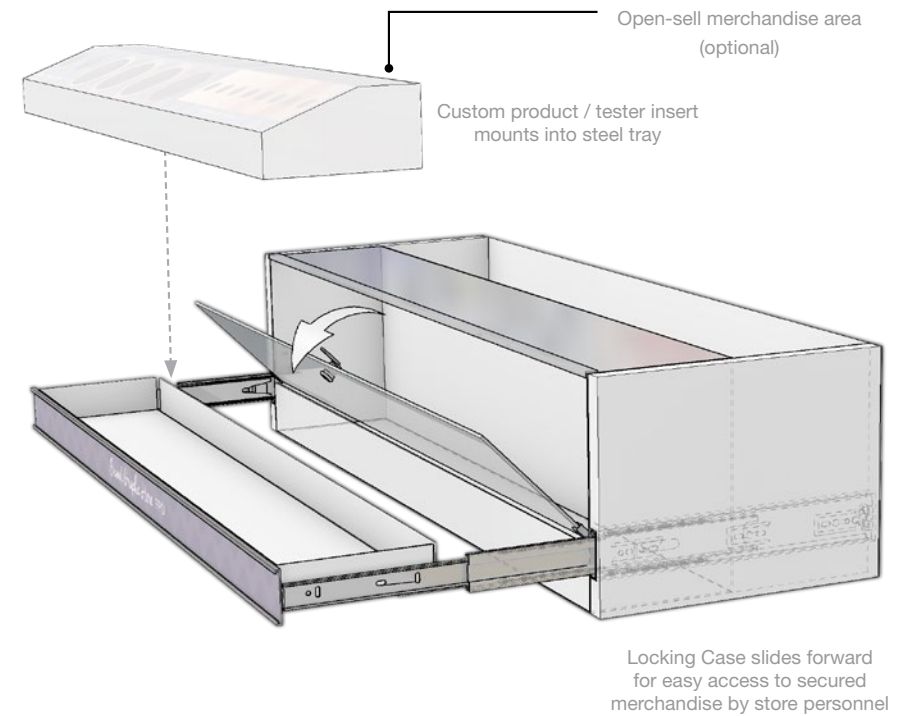

Stadium Cascade Shelf Fixture

Shelf Solutions

- Drop-in inline enclosure features an articulating drawer that receives custom product / tester inserts and a locking case that secures sellable merchandise
- Sliding drawer extends 12" into aisle bringing locking case flush to front edge of inline fixture to allow easy access to merchandise
- Clear acrylic locking case pulls forward to allow easy access to product when opened by store personnel
- Durable steel / composite construction

TRANSFORMING INSIGHTS INTO EXECUTION

Door opens down for access to locked merchandise / backstock

Drop-In Endcap Enclosure*

Endcap Solutions

Our Drop-In End Cap Enclosure converts a traditional endcap into a secure vehicle to drive sales in a highly visible location. Completely self-contained construction means this case comes out of the box fully assembled and ready to merchandise your products in a highly visible location.

Drop-In Endcap Enclosure

FOR CVS ELEVATED ENDCAP

This Crest 3D Whitestrips Endcap features our Drop-In Locking Case. The install was upgraded to feature battery-powered LED lighting with a motion sensor, as well as a graphic easel with a mirror that encouraged the shopper to “compare your smile”.

INSTALL

30-45 minutes

DIFFICULTY

Two Person Lift
Required

TRANSFORMING INSIGHTS INTO EXECUTION

Steel bracket provides extra level of security by anchoring lockbox to gondola shelf

FEATURES / BENEFITS

- Fast Installation / Arrives Fully Assembled
- Fold Down Door For Easy Product Access
- Bright / Clear Product Presentation
- Available in 2ft, 3ft, & 4ft widths

Also available in 4ft widths

Freestanding Security Endcap*

Freestanding Solutions

This freestanding fixture protects your assets while providing a large shelf to display demo products or other display elements.

Personal Electronics Endcap

We used our freestanding security endcap as part of this interactive tablet display. The endcap was enhanced with the inclusion of a lightbox graphic backer and edge-lit 3D brand logo. This endcap also utilized security tethers that provided power to the demo products.

Pilfer-Proof Locking Tower

Freestanding Solutions

Fully assembled encasement displays product behind a secure door and tempered glass panels trimmed with steel and melamine. A large locking door allows for easy access and restocking of four adjustable shelves. The display interior is illuminated by LED puck lights mounted inside the header. Kneeling casters allow the tower to be moved into position and then elevated on rubber pads reducing mobility and preventing full case loss.

FEATURES / BENEFITS

- Heavy-duty steel construction
- SFIC compliant lock
- Kneeling casters prevent display from being removed from position
- Tempered glass doors / shelves (other options available)
- Tower can be equipped with optional tether rail(s) for extra security
- Optional LED lighting

INSTALL

30-45 minutes

DIFFICULTY

Two Person Lift
Required

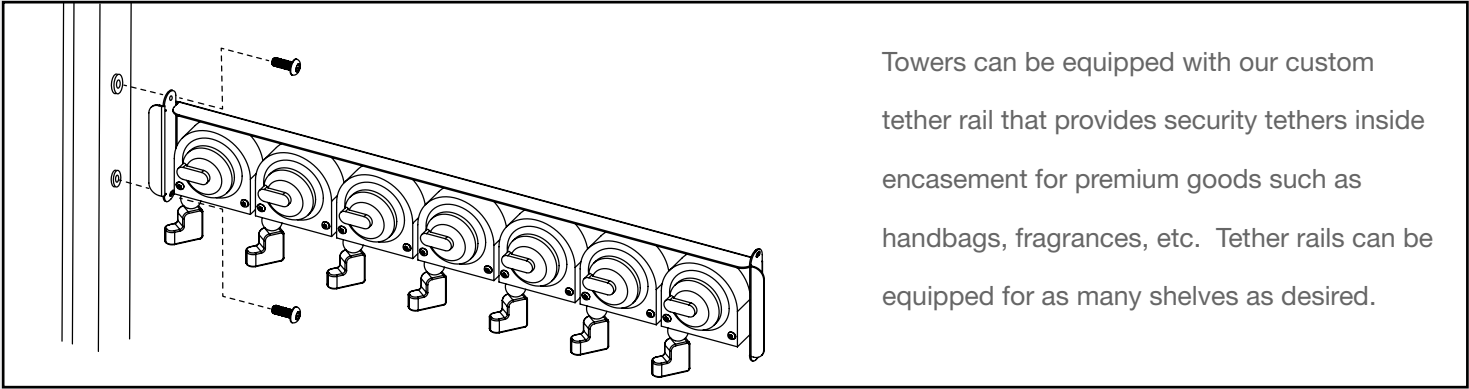

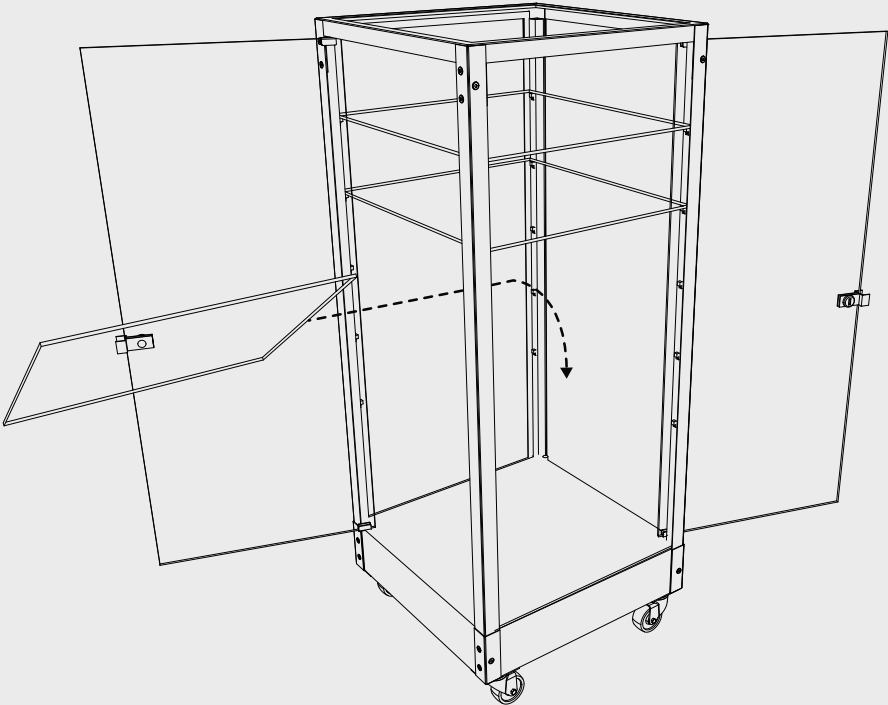

Store Associate
Install

No Tools
Required

Easy Shelf Installation

- 1. Unlock doors and insert shelf pins
- 2. Pivot glass shelves to place inside case & set onto 4 shelf pins

Towers can be equipped with our custom tether rail that provides security tethers inside encasement for premium goods such as handbags, fragrances, etc. Tether rails can be equipped for as many shelves as desired.
